

**Larry Ochs Sports Complex Master Plan
January 20, 2016 Community Workshop
Verbatim Group Responses**

Group 1

What elements / features of each concept does your group like best and would like considered in the final master plan? Why?

- Version #3 – Parking is not conducive to foul balls vs cars
- Move the soccer fields as far away from homes as possible because of game whistles
- Fix the traffic!

Group 2

Which Plan does your group believe is best overall for our community? Why?

- None! Brings too much traffic, congestion, crime, pollution (noise and garbage) to area

What elements / features of each concept does your group like best and would like considered in the final master plan? Why?

- None

What elements / features of each concept does your group most want to change? Why?

- Move to new location

Group 3

Which Plan does your group believe is best overall for our community? Why?

- C – Closed off location w/gate, smart design and organic flow of field locations

What elements / features of each concept does your group like best and would like considered in the final master plan? Why?

- Version #1 – Parking setup
- Version #2 – Flow of traffic and parking setup
- Version #3 – Roundabouts for flow of traffic, offshoot parking near 1st roundabout centralized baseball fields, common area in center for practice warm up

What elements / features of each concept does your group most want to change? Why?

- Version #1 – Outlying soccer fields w/centralized parking
- Version #2 – Flow of traffic and parking setup
- Version #3 – All

Group 4

Which plan does your group believe is best overall for our community? Why?

- Version #3 – Buffer between field and residence, parking layout, lawn in center

What elements / features of each concept does your group like best and would like considered in the final master plan? Why?

- Version #3 – As is

Group 5

Which plan does your group believe is best overall for our community? Why?

- Version #3 seems best.

What elements / features of each concept does your group like best and would like considered in the final master plan? Why?

- Version #3 – Greatest amount of buffer space between houses and parks

What elements / features of each concept does your group most want to change? Why?

- Version #1 – Location
- Version #2 – Location
- Version #3 – Location

Group 5

- Group decided that design decisions are no the priority: The priority is defining appropriate, safe and homeowners are addressed before design.
